

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claims 1-13 (canceled).

14. (Currently Amended) A solar-powered liquid crystal display device, comprising a solar structure including:

~~a solar structure including:~~

an at least partially transparent first carrier, ~~and~~

a solar cell arrangement carried by the first carrier and comprising, in stacked relationship:

an at least partially transparent first contact,

a photovoltaically active layer, and

a second contact disposed on a side of the photovoltaically active layer opposite that of the first contact; and

a liquid crystal display carried by the first carrier and comprising:

a first polarizer,

a liquid crystal,

a transparent third contact disposed on a side of the liquid crystal
opposite that of the first contact,

a transparent second carrier,

a second polarizer, and

a reflector,

wherein the solar cell arrangement includes an internal space formed therein,
and the liquid crystal display is aligned with the internal space.

15. (Canceled)

16. (Currently Amended) The device according to claim ~~45~~ 14 wherein the
liquid crystal display is disposed within the internal space.

17. (Previously Presented) The device according to claim 16 wherein the internal space extends through the photovoltaically active layer and the second contact.

18. (Currently Amended) The device according to claim ~~15~~ 14 wherein the internal space extends through the second contact, and the liquid crystal display includes a transparent fourth contact disposed on the liquid crystal display and extending into the internal space.

19. (Previously Presented) The device according to claim 18 wherein the fourth contact is disposed between the liquid crystal display and the photovoltaically active layer.

20. (Previously Presented) The device according to claim 14 wherein the first carrier includes front and rear sides; and wherein the solar cell arrangement, the first contact, the liquid crystal, the second contact, the second carrier, the second polarizer, and the reflector are carried on the rear side of the first carrier, and the first polarizer is carried on the front side of the first carrier.

21. (Previously Presented) The device according to claim 14 wherein the first carrier comprises a timepiece dial face.

22. (Previously Presented) The device according to claim 14 wherein the first polarizer is seated on the first carrier.

Claims 23-34 (Canceled)
